# The project:

You have to work on the development of a dynamic WebSite. You are completely free with the content of this site. For example a site about an association or a sport club ....However, it must be written with php code to obtain a dynamic result.

Evaluations are not fixed at the moment, we give you some time to realize it.

Technical specifications :

- use a data base : sqlite ou sql (up to you)
- mechanism of session in action : connect as administrator or user
- administrator and user have different rights : the administrator can add a user, delete or modify a member , the user can only read the database
- You should use forms
- html code will be performed in a validator : no errors, catch a screen shot to prove it
- a few pages (4 or 5 min)
- images, video (min one) , and text (>100 wordje dus répondre conjugations)
- protect the data base

BTS SNIR1 2019-2020
